## About University

山东第一医科大学（山东省医学科学院）

泰安校区

Shandong First Medical University

(Shandong Academy of Medical Sciences)

Tai 'an Campus

山东第一医科大学（山东省医学科学院）

济南校区

Shandong First Medical University

(Shandong Academy of Medical Sciences)

Ji'nan Campus

Shandong First Medical University is a key university of applied research and the largest academy of medical sciences in Shandong Province. Shandong First Medical University covers an area of 6000 mu, including two campuses (one in Jinan and the other in Taian) and many research institutions (located in Jinan, Qingdao and Jining and some other cities). Located in the core region of Ji'nan International Medical Science Center, Jinan campus is expected to cover an area of 2600 mu, with a building area of about 900,000 million square metres. With an area of 3000 mu, Taian campus has a building area of 820,000 square meters. With an area of 556.6 mu, Zhangqiu Biomedical Industrial Park owns a building area of 97,000 square meters.

With 32 teaching institutions, 5 scientific research institutions and 5 teaching auxiliary institutions, the university has a talent training system for the whole process of undergraduate, postgraduate and continuing education. At present, it has 45 undergraduate majors, 5 first-level disciplines authorized for master's degree, 67 master's disciplines authorized for master's degree, 1 first-level discipline authorized for doctor's degree, and 1 postdoctoral research station. Clinical medicine, pharmacology and toxicology, and biology and biochemistry are ranked in the top 1% of ESI. The university has 3 National Level 'First Class' Programmes, which are Clinical medicine, medical imaging technology and nursing science, 15 Provincial Level 'First Class'

Programmes, 6 key discipline of Shandong Province, 8 provincial feature specialties, 5 provincial high-level application-oriented programmes, 1 professional docking post for new and old kinetic energy conversion, 3 provincial pilot professional excellence engineers education training programs. At present, the university has more than 24,000 full-time students, including 22,111 undergraduate students, 1265 graduate students and 723 international students. It has more than 15,000 faculty and staff members, including 5 academicians of the Chinese Academy of Engineering (including 2 dual-employed academicians), 2,966 senior professional and technical personnel, and 6,031 staff with master's and doctor's degrees.

It has 13 directly affiliated hospitals and 23 non-affiliated hospitals, among which 12 are Class A tertiary comprehensive hospitals and 8 are Class A tertiary specialized hospitals. There are 16 national key clinical specialties and 7 national drug clinical trial institutions. It took the lead in China in basically eliminating kala-azar, filariasis, malaria and leprosy with the province as the unit, and won the "four consecutive championships" in the history of new China. It now guides Shandong Province in the prevention and treatment of occupational diseases, skin diseases, parasitic diseases, early diagnosis and treatment of tumors, radiation protection, prevention and treatment of blindness and rare diseases. It has the World Health Organization Collaborating Centre.

Shandong First Medical University,

among the first batch of universities that award Shandong Provincial Government Scholarship for Foreign Students, has recruited international students successfully since 2004 from more than 20 countries and regions in the world, including the United States, South Korea, India and Nepal and so on. Excellent teaching quality, faculty, equipment and graduates has earned the university a strong reputation across the globe. It has established good cooperation with many universities, medical organizations and scientific and research institutions from more than 30 countries and regions, including United States, UK, Australia, Russia, Japan, Hong Kong, Macao and Taiwan. 6 foreign experts were awarded “Shandong Qilu Friendship Award”.

In terms of cooperative education, we seek to cooperate with overseas high-level universities to establish Sino-foreign cooperative schools or programmes. As Sino- foreign cooperative programmes, we will cooperate in our predominant disciplines and programmes, including clinical medicine, oral medicine, pharmacology, nursing, and medical imaging and so on. Those programmes can be for bachelor, master or doctor, and we look forward to long-length schooling. Take clinical medicine with 8 years of schooling

for example, we recommend this kind of cooperative mode: Students complete their undergraduate in five years in Shandong First Medical University and are awarded degree and diploma from Shandong First Medical University; for the process of master’s learning, students can learn in China for 1 or 2 years, learn abroad for 1 or 2 years, and are awarded master’s degree and diploma from international partner institutions; we can also extend their overseas schooling length and learning periods, and students will learn 10 years in total and are awarded doctoral degree and diploma from international partner institutions. As for the cooperative education at the undergraduate level, we hope to have more high-quality international teachers to participate in the teaching. If possible, we can negotiate to award degree and diploma of both universities for undergraduates.

With excellent teaching and management system, advanced teaching and living facilities and equipment, and highly competitive faculty, we look forward to cooperating with more top-level overseas universities.

## II 国际教育学院介绍

### About School of International Education

In 1999, Shandong First Medical University got the qualification to enroll of international students, and recruit international language students and short-time studying students. Since 2004, it started to recruit undergraduates of clinical medicine. In 2007, it built International Education College, which is responsible for international students' education by implementing the management of enrollment, teaching, daily management, service apartment. College mainly recruits undergraduates of clinical medicine, master's level students, six years of undergraduate. College under the secretary, international students management, international students office, foreign training centers, teaching affairs office, foreign language teaching and research section.

School of International Education aims to create the advanced brand image of medical foreign students education in Shandong. It's objective is entering the ranks of advanced universities list in China in accordance with the principle of "stable scale, improve quality, adjust the structure, build the brand". Currently, it had enrolled nearly two thousand students from Pakistan, India, Nepal, Bangladesh, Kazakhstan, Garner, United States, South Korea, Canada, Russia and 20 other countries and regions. At present, there are more than 1,000 full-time undergraduate medical students. At the same time, it carried out training program for

master's level international students in China. The number of medical students in the school is ranked first among medical colleges in Shandong Province. According to the latest statistics, 2017, the internationalization level of students of our university is 33th best in the nation, first in Shandong province.

In June 2010, the first international students graduated from International Education School. At present, there are 1166 clinical medical undergraduate students graduated successfully, and participate in examination of practicing doctors' qualifications. The pass rate is above the benchmark. Particularly, Nepal graduates in 2012 achieved the rate of 86%, which is far higher than the national average. Our School has cooperated with many foreign universities and educational institutions to prepare short-term learning programs and intercultural training programs, related to Chinese language, Chinese history, Chinese culture, Chinese economy, Chinese medicine and so on.

School began to recruit students in western medicine undergraduate (English teaching) in 2010. In 2011, it became one of the state of national Chinese Proficiency Test (HSK test). In July 2011, it became one of the 16 institutions that the first to accept the Shandong provincial government foreign students scholarship, getting the numbers of scholarship is the first in Shandong's universities.

The school has established a group which is mainly responsible international students, and it has established the principle of guarantee quality, creates high quality brand of international student education development, introduced <on further strengthening international cooperation and exchange and promoting the work of international students>, <Opinions on further speeding up the development of education in China>, <management of training staff of international students> and other related policies to promote educational development. Now School of International Education is independent, and there are three international students' apartment buildings. The Construction area covers nearly twenty 2,0000 square meters. Students' dormitories are equipped with air condition, water heater, independent bathroom, which can accommodate nearly 1000 students. There are specialized teaching building, restaurant, sports facilities, the environment is beautiful and quiet. The school is building foreign teachers' apartment and international students' activity center, by which the living conditions of international students will be further improved.

Our School has cooperated with many foreign universities and educational institutions to prepare short-term learning programs and intercultural training programs, related to Chinese language, Chinese history, Chinese culture, Chinese economy, Chinese medicine and so on. For example, we carried out Chinese learning program with America and Canada, exchange program with Korea and Philippines, winter camp project with Xinhuan University of Korea, etc.; meanwhile we established the Chinese cultural experience site to innovate the mode of cultural experience and to scope out a new field of it. The Chinese cultural experience site offers a solid basis for aspects of global student recruitment, the construction of practical teaching staff, teaching Chinese for foreign students and featured activities.

The winter camp project with Xinhuan University of Korea held in January, 2011, for example, was being intended to achieve immersion education. On the basis of safety first and safety always, we arranged rich and colorful activities such as Chinese language course, general Introduction to China, traditional martial arts, shadowboxing, health Qigong, hospital visiting, culture experience in folk village, social gatherings, Mount Tai and Qufu city visiting, to strengthen students' learning interest, ability of Chinese reading, writing, speaking and listening comprehension through the superior curriculum, excellent faculty, and first-rate services. This project has won high praise from both China and Korea.

The school launched the planning of teacher training for medical international students, set up special fund. 160 key teachers qualified to teach international students, which provides a solid foundation to improve the teaching quality of international students. The school' recruit coverage expanded to Pakistan, India, Nepal, Bengal, Kazakhstan, Garner, the United

States, South Korea, Canada and other 23 countries and regions. In order to enhance education level of international students, the school began to recruit international students to cultivate for master's degree in the spring of 2015. The school established SRC of Taishan Medical University, with cooperation of Shanghai university of political science and law to built Cultural experience base for international students. TMU international students alumni association were established in both India and Nepal.

The education of international students in our school has been affirmed and praised by superior leaders and people from all walks of life. Specifically, Shandong governor, Guo Shuqing and other provincial leaders gave full affirmation to the achievements of our international students' education. Embassy officials in India, Iran, Garner, Pakistan Medical Council and the friend countries have sent a delegates repeatedly to our school to investigate the education of international students. About 40 India students in our school are invited to go to Shanghai to meet with Prime Minister of India, Modi, when he was in China. This event effectively enhanced the school's international influence. International students' education in our university is paid great attention by many media, which includes: the magazine "Seeking truth", Taian daily, Taian TV, Tencent news, Shandong news, Taishan evening news, Chinese network, China overseas network, people.com.cn, Qilu network, China college students' online, education online, the Education Department of Shandong Province, the NetEase and Taian Dazhong news , India's famous television IBN7and Aajtak and many other news media.

## II 2021 招生简章

### Enrollment Information
