About TJU

Tianjin University, formerly known as Peiyang University, was founded in 1895 as China's first modern university, and in 1959 was designated as one of the first national key universities. After the reform and opening up, Tianjin University was one of the first universities to be constructed under the "Project 211" and "Project 985", and was selected as type A university of the "World-Class Universities", also known as one of the first batch of universities to provide foundation program for international undergraduates awarded with Chinese Government Scholarships under the Ministry of Education of China. Tianjin University is ranked 201st-250th in the 2026 THE University Rankings and 257 th in the 2026 QS World University Rankings.

TJU has formed a comprehensive disciplinary layout with obvious advantages in engineering, combination of science and technology, and coordinated development of multiple disciplines such as economics, management, literature, law, medicine, education and art. There are 15 disciplines in the top 1% of ESI, five of which are in the top 1‰ of ESI, and engineering and chemistry are in the top 1‰.

Program Introduction

The foundation program at TJU is designed for students who plan to pursue science and engineering for further study, as the aim of foundation program is to arm students with a systematic study of general Chinese, technical Chinese, mathematics, physics and chemistry and help students proceed to degree programs of various disciplines at TJU or other renowned higher education institutions. At the same time, relying on the advantageous disciplines of Tianjin University, the foundation program is created to combine the characteristics of economics, management and commerce, laying a solid foundation for cultivating professional economic and management-oriented talents, and assisting learners in their future progress in the disciplines of economics, management and commerce.
