ZCST
Zhangzhou College
of Science & Technology

College Motto: Persist in truth and knowledge; Adhere to Morality and Dedication.

Educational Philosophy: Learn to be a decent person, learn to do things well, learn to seek knowledge and learn to be grateful.

About ZCST

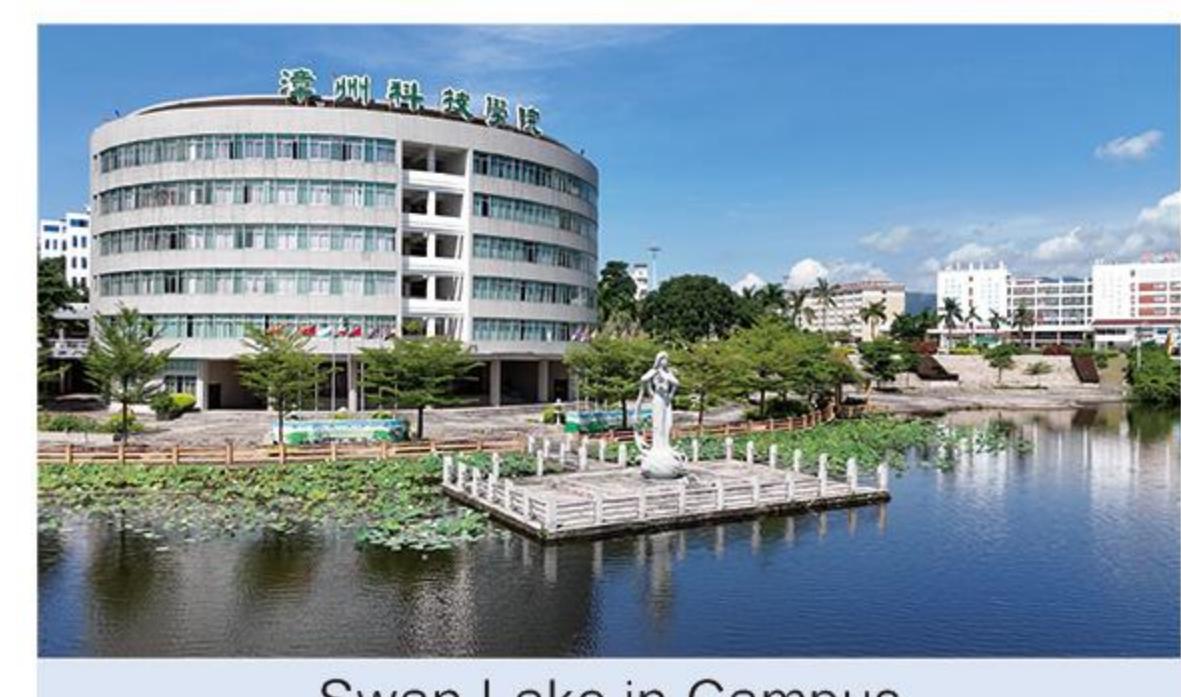

Located in southern Fujian, China, Zhangzhou College of Science and Technology (ZCST) is a non-profit higher vocational institution offering nationally unified enrollment and recruiting students home and abroad. ZCST was established in 2007 by Mr. Lee Ruiho, a renowned entrepreneur from Taiwan province, who is also known as the World Tea King, and Chairman of the Board of Directors for the Tenren and Tenfu Groups across the Taiwan Strait. ZCST's development was based on Tenfu Tea College and up to now has developed into a comprehensively vocational college with seven secondary schools covering science, technology apart from tea and food industry.

Colorful Campus Life

As a main part of Tenfu Group, Zhangpu County, ZCST is only more than one hour-ride from Xiamen, the well-known Special Economic Zone in Southern China, and stands out with a garden-style campus on the hillsides shaded by green trees, covering an total area of more than 1,700 acres. The traditional southern Fujian architecture harmoniously integrate with modern teaching and lab buildings. In the large campus there are comprehensive teaching and living facilities, including a standard sports field, a standard gym, a swimming pool, a library, and student dormitories with life conveniences.

About Majors

With a strong and lofty educational plot, ZCST has more than 17,000 students and 800 faculties in seven secondary schools committed to cultivating and educating high-level technical professionals for the 21st century. ZCST offers more than 42 majors among these different schools covering a variety of sci-tech and art majors, including tea and food science&technology, business, arts, tourism, education, medicine, information technology, and artificial intelligence as well.

First-Aid Training Course at Medical School

It should be emphasized that the Tea and Food School, as the characteristic part of ZCST, has become a renowned featured tea major among peers across China with remarkable achievements in tea plantation, culture, talent cultivation, and practical tea technique teaching. The School offers five core majors, namely Tea Production&Processing Technology, Tea Art&Tea Culture, Intelligent Food Processing Technology, Food Inspection &Testing Technology and Western Cuisine Technology.

Tea Processing Class

Food Making Class

The School holds a number of high-quality professional credentials, such as a provincial-level “Double High-Level” professional group and state-level key majors. Equipped with comprehensive practical training platforms and solid hardware capabilities, the school has established various high-quality platforms, including national and provincial-level practical training bases, high-skilled talent training bases, and collaborative innovation centers. Furthermore, as the Certified Tea Artist Examination Center authored by the National Ministry of Human Resources and Social Security, the school serves as a provincial-level training base for the yearly World Skills Competition and a pilot unit for the reform of provincial vocational skill level certification, providing strong support for practical teaching as well as fostering a large quantity of well-known talents in the tea industry.

Food Inspection Training Room

Western Cuisine Cooking Training Room

As the core speciality of ZCST, the Medical School has been committed to cultivating high-quality medical professionals since its establishment in 2020. It has formed in-depth cooperation with Tenfu Hospital, the college-affiliated hospital, and built an industrial park integrating multiple functions such as teaching, scientific research, and medical services.

Surgical Operation Training Course

Drug Dispensing Course

With more than 30 training rooms, the school has collaborated with over 20 provincial-level tertiary hospitals and a number of universities with jointly cooperative tasks related to teaching, scientific research, and internship training. With a strong faculty team, the Medical School has guided students to win numerous awards in various competitions. With over 90% of its students' employment in medical institutions/hospitals and remarkable achievements in medical field, the school has been honored with such titles as "National Excellent Social Practice Team" and "National Pilot School for First-Aid Education in Schools".

College Features

Based on a distinctive talent cultivation model, ZCST possesses special characteristics in running the college like "Fujian-Taiwan Cooperation" and "College-Enterprise Integration", both jointly and helpfully backing up students in their academic and professional career.

In terms of Fujian-Taiwan Cooperation, relying on its geographical advantages and resources from Tenfu Group, ZCST has set up sister-school relationships with 25 universities/colleges in Taiwan area. It focuses on such key majors as food baking, cosmetics and nursing, and deepens cross-strait educational integration by exposing students to unique Taiwan vocational education conceptions through faculty and student exchange, sharing joint training laboratories as well as cooperative academic and professional programs.

"Fujian-Taiwan Class" of AI Food Processing Technology

In College-Enterprise Integration, ZCST has successfully launched a variety of training programs with Tenfu Group, co-built training bases with dozens of enterprises across the country. All these programs and projects have achieved precise alignment for the teaching and industrial requirements, providing students with dual guarantees for practical professional training and employment.

Having co-hosted "The Tenfu's Prize" Cross-Strait Competition for 15 consecutive years

Go Global

ZCST is actively moving on the road of international exchange and cooperation, yielding fruitful outcomes in international education. Since 2009, ZCST has hosted dozens of China-Aid Projects commissioned by the National Ministry of Commerce. By the end of 2025, a total of 1,621 participants from 66 countries have attended various themed training courses at ZCST, which cover agriculture, tourism, telecommunication and tea-related specialties. The implementation of these China-Aid Training Program has played a positive role in strengthening the understanding and relationship between China and the participant countries as well as the popularization and exchange in tourism, agricultural technologies and electronic communication. Meanwhile, these programs have fully demonstrated China's achievements in economic and social development, and made significant contributions to publicizing the Chinese culture abroad and advancing the Belt and Road Initiative as well.
